

CARE INSTRUCTIONS

STANDARD CHANDELIER CARE INSTRUCTIONS

- **Never** use cleaning products on metal, porcelain, paper or bamboo surfaces.
- PORCELAIN FIXTURES: To remove fingerprints from metal or **Porcelain**, use water on a soft cloth and gently rub the area.
- BAMBOO OR HANJI FIXTURES: Do not put pressure on 4 sides or bottom of **Bamboo** or **Hanji** surfaces:
to handle bamboo and hanji shades only touch the top surface of the shape, the side with the holes cut out for bulbs and air.
- For routine maintenance, use only a feather duster or similar.
- If something should fall inside the shade, carefully remove the shade as shown in our installation videos (see our website for videos) and turn upside down to remove.
- Be careful **not** to twist the sockets when taking the shades on or off. Hold the socket with your thumb when installing and di-installing the shades to prevent wires from twisting.
